Windward Apps

CAPABILITY STATEMENT
SDVOSB · SBA certified

Enterprise-scale systems for government, in months, not years.

Windward Apps is a service-disabled veteran-owned software consultancy in Kailua, Hawai‘i. We build and modernize the systems agencies actually run on: custom applications, AI integration, public portals, data pipelines, and automation. Our engineers direct AI agents that write, test and refactor code, and a senior engineer reviews every line before it ships. That is how a small team delivers enterprise-scale work in months instead of years, at a fraction of the traditional cost.

CORE COMPETENCIES

- **Custom applications.** Web and mobile applications built around how people actually work, from major organizational systems to startup platforms and internal tools, connected to what is already in place.
- **AI integration.** Document intake, summarization and search across agency records; MCP servers that let an assistant act on existing tools. Access controls and audit trails included.
- **Modernization and automation.** Incremental replacement of paper, fax, spreadsheet and legacy processes, with data kept intact and hand-offs automated.
- **Data and reporting.** Pipelines that pull from existing systems into one source of truth, feeding dashboards and required reporting automatically.
- **Cloud and operations.** Deployment, infrastructure automation, and ongoing operations, with the agency owning every account.
- **GIS, desktop and hardware.** Geographic information systems, desktop software, embedded devices.

DIFFERENTIATORS

- **Agent-driven development.** AI agents do the hours behind every feature. Budgets that used to buy a requirements study now buy a finished system.
- **Senior accountability.** A senior engineer directs the work and reviews every line of code. No junior bench, no hand-offs.
- **Working software early.** Something to review within the first sprint, then short iterations until delivery.
- **Scope you can trust.** A short discovery phase first, then firm-fixed-price for defined scope. Time-and-materials for support and evolving work.
- **You own everything.** Code, data and infrastructure accounts belong to the agency from day one.
- **SDVOSB.** Eligible for set-aside and sole-source awards. Prime or subcontractor.

PAST PERFORMANCE

Hawai‘i Department of Health · COVID-19 vaccine reporting pipeline
Built the pipeline that turned CDC VAMS records into the daily vaccination reports CDC required before releasing more vaccine to Hawai‘i in late 2020. Six months with DOH, the State Epidemiologist and CDC, as subcontractor to Hawai‘i Data Collaborative.
Reference: Hawai‘i Data Collaborative; contact details on request

Hawai‘i Commission on Water Resource Management · GIS software
Custom geographic information system software for the State of Hawai‘i agency, under the Department of Land and Natural Resources, that regulates the state’s water resources.
Reference: Roy Hardy, roy.hardy@hawaii.gov

Shine Rite · On-demand mobile car-wash marketplace
Customer and provider mobile apps with scheduling, dispatch and payments. Launched and ran in production in Texas for several years.
